

JURNAL PEMBELAJARAN FISIKA

Development of HOTS Assessment Instruments on Newton's Law of Motion by Using Multiple Types of Problems in High School Physics Lessons

Novinta Nurulsari, Undang Rosidin, Eneng Vera Dwi Indriyani*

Validity and Practicality of Ongoing Assessment using STEM Approach Based Multiple Representation and Integrated with 21st Learning

Indah Permatasari, I Wayan Distrik, Undang Rosidin*

Diagnosis of Student Misconception in Heat Material Using Tier Test

Heny Ekawati Haryono, Khafidhoh Nurul Aini, Achmad Samsudin, Parsaoran Siahaan*

D-learning model on Physics Instrumentation Course for Optimizing Performance Skills

Agus Suyatna, Viyanti, Doni Andra, Ismi Rakhmawati*

The Effectiveness of Problem-Based Electronic Worksheet to Increase Student Creativity in Hooke's Law

I Dewa Putu Nyeneng, Reza Afrian Yudha, Hervin Maulina*

Students' Understanding on Physics Equations Used in the Experiment

Ign Edi Santosa

Development of Mechatronics Trainers as Practical Learning Media for Electrical Engineering Vocational Education Students

Irwanto, Ratna Ekawati*

Implementation of Conceptual Change of Gas Kinetic Theory Material using Process Images

Indro Wicaksono, Linda Kurnia Supraptiningsih, Haritsah Alfad*

Implementation of Learning Media Using Augmented Reality Technology for Senior High School Students

Rosynanda Nur Fauziah, Dwi Sulisworo*

The Effect of Using Project Base Learning (PjBL) Models on Students' Creative Thinking Ability in Solar System Materials

Vivit Nurhikmah Havita, Sjaifuddin, Asep Saefullah, Lukman Nulhakim, Diana Ayu Rostikawati*

Student Practicum Competencies through Lesson Study with the application of Argument Driven Inquiry

Nurhasana Siregar, Rodiah Ulfah Lubis, Puspa Riani Nasution*
